CPI refers to the CPI (all urban areas) as provided by Statistics South Africa, effective 1 January 2009. Prior to January 2009, the CPIX (all metropolitan and urban areas) was used as the measure for inflation for our funds. The benchmark returns shown here are a composite of the two measures. The previous month's change in inflation is used as an estimate for the current month (since inflation numbers are released one month in arrears).
