## INVESTMENT DESCRIPTION AND OBJECTIVE

The portfolio seeks to grow capital in excess of inflation and targets returns of 3% to 5% above inflation per annum (after fees) over rolling five-year periods. The portfolio invests in index tracking mandates across asset classes including, for example, listed shares, listed property, bonds and cash, both in South Africa and globally. Old Mutual Multi-Managers makes the asset allocation decisions. The portfolio is suitable for investors with a medium-term time horizon who are comfortable with some volatility in returns. It has balanced exposure to growth assets, such as equities and property, and income-generating asset classes. The portfolio is offered to investors through a life policy.
